A. IMPROVEMENT OF HEVTEB BAKING LABORATORY

1. The project must be finished in 60 working days.
2. The materials will be supplied by the university.
3. Actual site inspection is a must.
4. The area should be cleared before and after the construction work at least six meters away from the job site.
5. Unusable formworks, excessive soil fill and all other unwanted debris of construction works should be disposed properly.

B. TECHNICAL DESCRIPTION

I. Site Clearing and Preparation

1. Chipping of floor tiles of laundry area. Comfort rooms are not included.
2. Dismantling of existing lavatories/concrete sink at laundry area and laboratory room.
3. Dismantling of existing windows at comfort room and laundry area.
4. Hauling of debris.

II. Tiles and Masonry Works

1. Installation of tiles at laundry area. This work will include application of tile grout and hauling of debris.
2. Plastering and detailing of window sill of laundry area and comfort rooms. Window sill must be in plain cement.

III. Plumbing, Sanitary and Mechanical Works

1. Installation of new water supply pipeline and drainage/sewer pipeline.
2. Installation of new plumbing fixtures. This work will include:
 - a. 2 sets of heavy duty faucet at laundry area.
 - b. 1/2" Ø Gate Valve
 - c. Tap to existing water supply pipeline/source.
3. Installation of LPG supply pipeline. This work will include:
 - a. Gate valve for every cooking range.

- b. One set of check/gate valve for main LPG tank.

IV. Electrical Works

1. Installation of new ACU outlet.
2. Installation of two-gang convenience outlet.
3. Installation of additional lighting fixtures.

V. Painting Works

1. Surface Preparation
 - a. Remove all loose, scaling, flaking and peeling off paint by wire brushing, scraping, or rough sanding.
 - b. When necessary, use paint and varnish but make sure that residue is completely washed off from the surface to prevent adverse with succeeding coats. Let it dry.
 - c. Sand smooth painted surfaces for improved inter-coat adhesion.
 - d. For chalking old latex paint, apply one (1) coat of chalk blocker if necessary. Let dry overnight.
 - e. In case of mildew infestation, treat affected areas with a fungicidal wash solution or household bleach mixed with water (1:3, respectively). Let the treatment stay overnight before wiping off residue with damp cloth. Let dry.
2. Paint Application
 - a. Prime bare substrate with pre-mix waterproofing elastomeric paint. Let dry for one (1) hour.
 - b. Putty minor surface imperfections with masonry putty. Let dry for one (1) hour. Spot primer puttied portions.
 - c. Finish with two (2) coats of pre-mix waterproofing elastomeric paint. Let dry for one (1) hour in between coats.

VI. Doors and Windows

1. Supply and installation of two sets of 660mm x 2100mm PVC doors for comfort rooms.
2. Supply and installation of one set of 700mm x 2100mm steel door.
3. Supply and installation of four sets of awning type window for comfort rooms and laundry room.
4. See attached plan for details and reference.

VII. Note

1. See/consult end-user for details/extent of work. The silence of specification, plans, special provision and supplementary specifications as to any detail, or the apparent omission therein of a detailed description or definition of the quality of materials and workmanship shall be regarded to mean that only materials and workmanship of first class quality are to be used or employed.
2. All works will be facilitated by the contractor.
3. All tools and equipment necessary for executing the work will be provided by the contractor/PPS Office.
4. Works that are necessary but are not cited in the above specifications will be facilitated by the PPS Office and the contractor.
5. Materials that are necessary but are not included in the above program of works will be facilitated by the PPS Office.
6. No modifications will be done without the approval of end-user, project inspector, and implementor.
7. Verify actual measurement on site.
